SYSTEM SOLUTIONS

TAMPOPRINT® - your system partner!

In 2010, TAMPOPRINT® AG has established its full service offer: assembly automations. This means, beside of the marking technology using laser and/or tampon printing, we offer complete system solutions including the assembly technology for your products.

Please send your enquiries directly to:
vkm@tampoprint.de

*We are your reliable partner for
all industrial automation and
assembly tasks!*

TAMPOPRINT® - your system partner!

TAMPOPRINT® AG is a well-established partner for the "medical-technical industry".

Our automated systems are in use worldwide.

As a long-time partner of many well-known pharmaceutical companies and their suppliers we have developed a very high know-how in this industrial sector.

Starting with the project planning, the de-risking via validation process, URS, FMEA, IQ and OQ, via FAT and SAT to the production support. Especially for the pharmaceutical industry we offer an all-round service with solutions that are unparalleled.

Our tampon printing and laser fully automatic machines meet the highest quality requirements when used in multi-shift operation with high throughput speed.

Highest precision of the print image registration on convex, round or flat parts by using the tampon printing process, one to multicolour, or by using the ALFALAS® laser marking process goes without saying and meets the high standards for medical products. Process monitoring by using the latest camera systems as well as their validation will secure your production and the health of the patients.

Machinery construction "Made in Germany", supported by highly qualified staffs in the sales department, project management, engineering department as well as pre- and after-sales service will guarantee the professional realisation from the concept to the 24 hour production to our customers.

TAMPOPRINT® AG is the solid and reliable supplier for the international medical industry and makes their products successful. We make markings, scales and decorations possible where other processes reach their limits.
